- Figma
- Unity 3D
- Bootstrap Studio
- Webstorm
- HTML
- CSS
- Javascript
- Freehand Sketching
- Microsoft Office

I'm a Product Designer with skills in UI Design, UX Design and Front-End development using HTML, CSS and JavaScript. I started off as an illustrator through self-study, and got trained formally as a Designer. I enjoy tinkering with forms, doing product tear-downs, understanding functioning of a product apart from refining the physical appearance of the product.

My mantra of working on something is to keep the tables organised and approach the problem systematically.

Work Experience
